From late 2010 a series of dramatic and unprecedented events swept across the Middle East and North Africa, toppling several autocratic regimes that had held power for decades and ushering in a new climate of dissent and democratisation. *The Arab Revolutions in Context* seizes a unique opportunity to reflect on these seismic events, their causes and consequences, and the core issues facing the region as it moves forward. This volume is more than a collection of detailed thematic essays, however. It situates the Arab Revolutions within their broader contextual backgrounds--showing that a unique set of historical events, as well as local, regional and global dynamics, has converged to provide the catalyst that triggered the recent revolts--and also within a new conceptual framework. The argument here is that the Arab Revolutions pose a very specific challenge to conventional wisdom concerning democracy and democratisation in the Middle East. *The Arab Revolutions in Context* is the first volume of its kind to address the Arab Revolutions and the varying analyses, debates and discussions that they have stimulated.
