The field of science and technology has amalgamated in a way which denotes progress and ease for the human race. This combination has also served the area of communication and transmission, where we see hundreds of radio stations and TV channels serving the need for communication. It looks miraculous to listen to someone sitting miles away or seeing someone sitting miles apart but appearing on our screens.

In this book, the focus is to target those people who have an interest related to setting up a radio station of their own. For a common man it may look quite impossible to maintain a system of waves just like their radio or television screen but digging deeper into the field you will notice that it is not impossible even at the individual level, to set up a radio set up on your own. So attention has been diverted towards the basic knowledge which will be helpful for the beginners.

The helpful discussions which are penned in this book will relate to the following major issues, which are all intended for the presentation of underlying the basic foundational principles of Ham radio.

- The introductory facts for mentioning the introductory part of Ham radio, its existence and presence both at the commercial and the personal level.
- An account of some basic concepts related to Ham radio waves propagation and wave features.
- An account of some advanced concepts related to electric current and magnetic field related to Ham radio set up.
- The suggestions for setting up the Ham radio with particular reference to the selection of a right antenna.
