Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants

Sabine Latteman

Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants Sabine Latteman

Seawater desalination is a coastal-based industry. The growing number of desalination plants worldwide and the increasing size of single facilities emphasises the need for greener desalination technologies and more sustainable desalination projects. Two complementing approaches are the development and implementation of best available technology (BAT) standards and best practice guidelines for environmental impact assessment (EIA) studies. While BAT is a technology-based approach, which favours state of the art technologies that reduce resource consumption and waste emissions, EIA aims at minimizing impacts at a site- and project-specific level through environmental monitoring, evaluation of impacts, and mitigation where necessary. This book contains a comprehensive evaluation and synthesis of the potential environmental impacts of desalination plants, with emphasis on the marine environment and aspects of energy use, followed by the development of strategies for impact mitigating. A concept for BAT for seawater desalination technologies is proposed, in combination with a methodological approach for the EIA of desalination projects. The scope of the EIA studies are outlined, including environmental monitoring, toxicity and hydrodynamic modelling studies, and the usefulness of multi-criteria analysis as a decision support tool for EIAs is explored and used to compare different intake and pretreatment options for seawater reverse osmosis plants.

From reader reviews:

Sarah Tomczak:

The book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants give you a sense of feeling enjoy for your spare time. You can use to make your capable far more increase. Book can being your best friend when you getting strain or having big problem with the subject. If you can make looking at a book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants being your habit, you can get much more advantages, like add your own capable, increase your knowledge about some or all subjects. You may know everything if you like available and read a publication Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants. Kinds of book are a lot of. It means that, science e-book or encyclopedia or other people. So , how do you think about this e-book?

Gloria Lockwood:

What do you think of book? It is just for students since they are still students or the idea for all people in the world, the particular best subject for that? Just simply you can be answered for that question above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't wish do that. You must know how great and important the book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants. All type of book can you see on many resources. You can look for the internet sources or other social media.

Michelle Gilbert:

This book untitled Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants to be one of several books which best seller in this year, here is because when you read this reserve you can get a lot of benefit on it. You will easily to buy this specific book in the book shop or you can order it by means of online. The publisher on this book sells the e-book too. It makes you quicker to read this book, because you can read this book in your Smartphone. So there is no reason to you to past this guide from your list.

Gregory Medina:

The particular book Development of an Environmental Impact Assessment and Decision Support System for Seawater Desalination Plants has a lot of information on it. So when you read this book you can get a lot of gain. The book was written by the very famous author. Mcdougal makes some research previous to write this book. This particular book very easy to read you may get the point easily after perusing this book.
