Tratado de medicina cardiovascular (Spanish Edition)

Tratado de medicina cardiovascular (Spanish Edition)

Tratado de referencia en el campo de la medicina cardiovascular basado en los cambios que se han producido en la última década. Entre ellos se incluye el uso de la angiografía TC multidetectora, el uso rutinario de endoprótesis vasculares con liberación de fármacos por intervención coronaria percutánea, el empleo de procedimientos de aislamiento de venas pulmonares para eliminar la fibrilación auricular, el incremento de la aceptación de estatinas, los inhibidores de la ECA y desfibriladores y la terapia de resincronización para tratar la insuficiencia cardíaca. Estamos en un momento de grandes avances en la genómica asociada a rasgos cardiovasculares complejos como el infarto de miocardio y las valvulopatías, y por esta razón se ha puesto énfasis en los aspectos de genética molecular cardiovascular. En esta 3.² edición se resaltan todos estos importantes cambios. Existen nuevos capítulos que tratan cuestiones como "Mujeres y cardiopatía", "Prevención de la insuficiencia cardíaca", "Células madre y regeneración miocárdica", "Resincronización cardíaca", "Tratamiento perioperatorio", "Reparación valvular percutánea e intracardíaca y procedimientos intracardíacos", además de otros que captan los avances en cardiología molecular.
