Algebraic Functions and Projective Curves (Graduate Texts in Mathematics)

David Goldschmidt

Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) David Goldschmidt

This book gives an introduction to algebraic functions and projective curves. It covers a wide range of material by dispensing with the machinery of algebraic geometry and proceeding directly via valuation theory to the main results on function fields. It also develops the theory of singular curves by studying maps to projective space, including topics such as Weierstrass points in characteristic p, and the Gorenstein relations for singularities of plane curves.

From reader reviews:

Georgetta Watson:

The event that you get from Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) will be the more deep you digging the information that hide inside the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to know but Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) giving you enjoyment feeling of reading. The writer conveys their point in selected way that can be understood by anyone who read that because the author of this publication is well-known enough. That book also makes your personal vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We highly recommend you for having this Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) instantly.

Neil Calvert:

Playing with family in a very park, coming to see the sea world or hanging out with friends is thing that usually you might have done when you have spare time, after that why you don't try factor that really opposite from that. A single activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Algebraic Functions and Projective Curves (Graduate Texts in Mathematics), it is possible to enjoy both. It is fine combination right, you still wish to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't understand it, oh come on its called reading friends.

Dolores Albert:

Is it a person who having spare time then spend it whole day through watching television programs or just lying down on the bed? Do you need something totally new? This Algebraic Functions and Projective Curves (Graduate Texts in Mathematics) can be the solution, oh how comes? It's a book you know. You are consequently out of date, spending your free time by reading in this fresh era is common not a geek activity. So what these publications have than the others?

Darrel Mason:

What is your hobby? Have you heard that will question when you got learners? We believe that that query was given by teacher with their students. Many kinds of hobby, Everybody has different hobby. And also you know that little person just like reading or as studying become their hobby. You have to know that reading is very important as well as book as to be the point. Book is important thing to add you knowledge, except your current teacher or lecturer. You get good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them are these claims Algebraic Functions and Projective Curves (Graduate Texts in Mathematics).
