Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity

Sheri R. Colberg

Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity Sheri R. Colberg

Physical movement has a positive effect on physical fitness, morbidity, and mortality in individuals with diabetes. Although exercise has long been considered a cornerstone of diabetes management, many health care providers fail to prescribe it. In addition, many fitness professionals may be unaware of the complexities of including physical activity in the management of diabetes. Giving patients or clients a full exercise prescription that take other chronic conditions commonly accompanying diabetes into account may be too time-consuming for or beyond the expertise of many health care and fitness professionals.

The purpose of this book is to cover the recommended types and quantities of physical activities that can and should be undertaken by all individuals with any type of diabetes, along with precautions related to medication use and diabetes-related health complications. Medications used to control diabetes should augment lifestyle improvements like increased daily physical activity rather than replace them.

Up until now, professional books with exercise information and prescriptions were not timely or interactive enough to easily provide busy professionals with access to the latest recommendations for each unique patient. However, simply instructing patients to “exercise more” is frequently not motivating or informative enough to get them regularly or safely active. This book is changing all that with its up-to-date and easy-to-prescribe exercise and physical activity recommendations and relevant case studies.

Read and learn to quickly prescribe effective and appropriate exercise to everyone.

From reader reviews:

Lucile Brown:

As people who live in typically the modest era should be update about what going on or details even knowledge to make them keep up with the era which is always change and advance. Some of you maybe will update themselves by reading through books. It is a good choice for yourself but the problems coming to you actually is you don't know what type you should start with. This Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

Evelyn Roberts:

Spent a free time to be fun activity to try and do! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, about to beach, or picnic within the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Can be reading a book could be option to fill your free of charge time/ holiday. The first thing that you will ask may be what kinds of guide that you should read. If you want to try look for book, may be the reserve untitled Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity can be great book to read. May be it can be best activity to you.

Joey Mendoza:

The reason why? Because this Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity is an unordinary book that the inside of the book waiting for you to snap the item but latter it will jolt you with the secret this inside. Reading this book adjacent to it was fantastic author who else write the book in such awesome way makes the content within easier to understand, entertaining method but still convey the meaning entirely. So , it is good for you for not hesitating having this any more or you going to regret it. This book will give you a lot of advantages than the other book have got such as help improving your expertise and your critical thinking technique. So , still want to postpone having that book? If I had been you I will go to the book store hurriedly.

Robert Collado:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is written or printed or outlined from each source that will filled update of news. In this modern era like at this point, many ways to get information are available for an individual. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, new and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just seeking the Exercise and Diabetes: A Clinician's Guide to Prescribing Physical Activity when you required it?
