Protocolos de cardio-RM y cardio-TC de la Unidad de Imagen Cardiacas Sant Pau (Spanish Edition)

Guillem Pons Lladó

Las técnicas de cardio-resonancia magnética (cardio-RM) y de cardio-tomografía computarizada (cardio-TC) se han introducido de forma plena en el campo diagnóstico de la cardiología, pero su aplicación no está generalizada. Los grupos con una experiencia amplia en este medio son escasos y los cardiólogos o radiólogos que desean iniciarse en ellas no encuentran fácilmente referencias formativas. Para dar respuesta a estas necesidades, la Unidad de Imagen Cardiacas Sant Pau (UICSP), tras la experiencia de más de 10.000 estudios de cardio-RM y 9.000 de cardio-TC, ha propiciado la elaboración de esta monografía, completando así su amplia propuesta formativa (visitas MIR, cursos intensivos para especialistas cardiólogos o radiólogos, y el Máster en Técnicas Avanzadas de Diagnóstico por la Imagen en Cardiología, en colaboración con la Universitat Autònoma de Barcelona). Esta obra resultará eminentemente útil a cardiólogos y radiólogos implicados en las técnicas de cardio-RM y de cardio-TC, en particular si se inician en su práctica de forma regular. Se presentan de manera ordenada los protocolos de aplicación en las diferentes enfermedades en estudio. Cada capítulo cuenta con recomendaciones concisas de referencias bibliográficas adonde acudir para profundizar en los aspectos que se comentan, y las ilustraciones que acompañan al texto suponen un gran apoyo en la obtención de imágenes y en su interpretación. Un recurso de gran utilidad para la atención clínica habitual de los servicios del hospital implicados en el cuidado de pacientes cardiacos.
